

ACCOUNTS MODULE – TEST CASE REPORT

• Unit Test Cases

Test ID	Test Case Name	Description	Test Steps	Expected Result	Status
TC-AC C-U01	test_user_string	Verify __str__ returns email + role	Create User object → call str(user)	Output matches "email (role)"	Pass
TC-AC C-U02	test_client_age_method	Validate client age() method	Create Client with valid DOB → call age()	Age returned correctly based on current date	Pass
TC-AC C-U03	test_specialization_str	Check Specialization string representation	Create specialization → call str()	Returns specialization name	Pass
TC-AC C-U04	test_email_verification_is_valid	Validate email verification token expiration	Create token with valid & expired timestamps → call is_valid()	Valid token returns True, expired returns False	Pass

• Integration Test Cases

Test ID	Test Case Name	Description	Test Steps	Expected Result	Status
TC-AC C-I01	test_register_client_success	Validate full client registration flow	POST registration form → create user + client profile → check response	Returns success JSON + user created in DB	Pass
TC-AC C-I02	test_register_counsellor_success	Validate counsellor registration workflow	POST registration with profession details + documents	Counsellor profile created + verification record generated	Pass

TC-AC C-I03	test_verification_email_sent	Ensure email verification triggered during signup	Register new user → capture email send	Email sent successfully	Pass
TC-AC C-I04	test_login_fail_if_not_verified	Ensure unverified users cannot login	Register user → login immediately	Error "Please verify your email"	Pass
TC-AC C-I05	test_login_success_after_verification	Validate login after successful verification	Register → manually mark is_email_verified = True → login	Login success JSON returned	Pass
TC-AC C-I06	test_logout	Validate logout functionality	Login user → call logout view	Returns success message & session ended	Pass

Overall Module Testing Summary

Category	Total Tests	Passed	Failed	Status
Unit Tests	4	4	0	Successful
Integration Tests	6	6	0	Successful
Total	10	10	0	ALL TESTS PASSED

Conclusion

The **Accounts module is fully validated** through Django unit + integration tests.

Core user management flows — **Registration, Email Verification, Login, Logout, and Model Behaviors** — are functioning correctly without breaking dependencies.
